Project Summary

Kaimono (Japanese for "shopping") is a **digital game store and community platform** — a Steam-like experience where users can browse, purchase, review, and manage games, participate in community discussions, polls, and feeds, and manage their profiles and settings. It supports two user roles: **Gamers** and **Developers**, with a separate **Admin Panel** for content management.

Key capabilities:

- **Shop** with product catalog, game detail pages, checkout, and library management
- **Community** hub with posts, polls, comments, channels, and game-following
- **User profiles** with avatars, banners, social links, and theme customization
- **Developer panel** for game submissions (commission system)
- **Admin panel** for CRUD on products, users, community content, and submission review
- **AI Companion** integration (Google Gemini)
- **Supabase** for PostgreSQL database and S3-compatible file storage
- Custom **global theme system** with 4 variants (Midnight, Silver, Paper, Obsidian)

Tech Stack

Layer	Technology
Framework	Django 6.1
Language	Python 3.12
Database	PostgreSQL (Supabase) / SQLite (local fallback)
File Storage	Supabase Storage (S3-compatible) via boto3

Layer	Technology
Image Processing	Pillow
Environment Config	django-environ
Static Files	Whitenoise
AI Integration	Google Gemini API
Deployment	Vercel (serverless)
Frontend	Vanilla JS, HTML/CSS (no React/Vue)

Python Dependencies (requirements.txt)

```
Django>=6.1,<7
psycpg[binary]>=3.3
django-environ>=0.14
boto3>=1.43
Pillow>=11
whitenoise>=6.7
requests>=2.31
```

Key Features

Shop & Store

- Full product catalog driven by ShopProduct model in database
- Game detail pages with trailers (YouTube embeds), screenshots, reviews, accolades
- Checkout system that auto-creates library entries on purchase
- Wishlist toggle (add/remove per user)
- Product search and filtering
- Legacy products.js catalog still loaded for backward compatibility

Library & Wishlist

- Per-user library (games purchased appear automatically after checkout)
- Wishlist with toggle API (/api/wishlist/toggle/)
- Library game status tracking (Installed, Not Installed)
- Favorite marking

Community

- Posts — announcements, image posts, polls, discussions, guides
- Polls — vote, re-vote, live percentage updates
- Comments — add/view per post
- Channels — hash-based channel system with post counts
- Feed filters — For You, Trending, Latest, Media, Following
- Game Following — follow games from detail page, appears in community
- Friends/Members — online indicators, profile preview modals
- Share — increment share counter per post
- AJAX-driven feed loading (load more, page switching)

Global Theme System

- 4 themes: Midnight, Silver, Paper, Obsidian
- localStorage-based persistence
- CSS custom properties with --on-brand contrast system
- Applied across all pages (dashboard, shop, community, wishlist, library, settings)

User Accounts

- Custom User model extending AbstractUser
- Roles: Gamer, Developer
- Profile: display name, bio, avatar, banner (S3-uploaded), social links (Twitter, Instagram, YouTube, Twitch)
- Settings: theme, language (EN/JA/ID), currency (USD/JPY/IDR), timezone, sidebar preferences
- Account setup flow after registration
- Delete account functionality
- Age minimum (18+), no spaces in username

Admin Panel

- Staff-only access (is_staff check)
- Products — CRUD, toggle active/inactive, edit with screenshots
- Users — CRUD, toggle admin status, delete (can't delete self)
- Community — manage posts, channels, members, comments
- Submissions — review developer game submissions (accept/reject)
- Dashboard overview with counts

Developer Panel

- Game submission form (name, category, type, brand, price, image, description, tags, trailer URL, screenshots)
- Submissions go to "pending" status for admin review
- Accepted submissions become ShopProduct entries automatically
- YouTube trailer URL parsing for embed/poster

AI Companion

- Chat interface powered by Google Gemini API
- Conversation history per session
- Clear/reset conversation endpoint

Checkout & Payments

- Modal-based checkout (QRIS / Card payment methods visible in screenshots)
- Checkout completion creates LibraryGame entries
- Ownership check API (/api/shop/check-ownership/)

Models & Data Layer

Accounts App

Model	Purpose
User	Extended user with role, profile, theme, social links, preferences

Dashboard App — Core Commerce

Model	Purpose
ShopProduct	Products in the store (name, category, price, image, JSON data blob)
WishlistItem	Standalone wishlist items (legacy, pre-database)
UserWishlistItem	Per-user wishlist linked to ShopProduct
LibraryGame	User's purchased games
GameSubmission	Developer game submissions (pending/accepted/rejected)
GameReview	User reviews on products (positive/negative, hours played)

Dashboard App — Community

Model	Purpose
CommunityStory	Story-style user avatars at top of community
CommunityChannel	Channel system (#name, slug, icon, post count)
CommunityGame	Games shown in community sidebar (followable)
CommunityPost	Posts (announcement, image, poll, discussion, guide)
PostImage	Images attached to posts
PostTag	Hashtags on posts
PostReaction	Reaction types on posts
Poll	Poll question (1-to-1 with poll-type post)
PollOption	Individual poll choices
PollVote	Per-user poll votes
CommunityComment	Comments on posts
UserLike	Post likes
UserBookmark	Bookmarked posts
UserFollowedGame	User's followed community games
CommunityMember	Community friends/members with profiles

URL Routes

Public Pages

Path	View	Name
/	landing	landing

Path	View	Name
/login/	login_view	login
/register/	register_view	register
/logout/	logout_view	logout
/accsetup/	accsetup_view	accsetup
/shop/	shop	shop

/community/	community	community

Authenticated Pages

Path	View	Name
/profile/	profile_view	profile
/dashboard/	dashboard	dashboard
/wishlist/	wishlist	wishlist
/library/	library	library
/settings/	settings_view	settings
/settings/ai-companion/	ai_companion	ai_companion
/settings/delete-account/	delete_account_view	delete_account

Admin & Developer

Path	View	Name
/settings/admin/	admin_panel	admin_panel
/settings/developer/	developer_panel	developer_panel
/settings/developer/submit/	developer_panel_submit	developer_panel_submit

API Endpoints (AJAX)

Path	Method	Purpose
/api/community/vote/	POST	Vote on a poll
/api/community/post/	POST	Create a post
/api/community/post/edit/	POST	Edit a post
/api/community/post/delete/	POST	Delete a post
/api/community/comment/	POST	Add a comment
/api/community/comments/	GET	Get comments for a post

Path	Method	Purpose
/api/community/share/	POST	Share a post
/api/community/games/follow/	POST	Follow/unfollow a game
/api/shop/checkout/	POST	Complete checkout
/api/shop/check-ownership/	GET	Check if user owns a product
/api/wishlist/toggle/	POST	Toggle wishlist item
/api/wishlist/list/	GET	Get wishlist items
/api/reviews/	GET	Get reviews for a product
/api/reviews/submit/	POST	Submit a review
/api/ai/chat/	POST	Chat with AI companion
/api/ai/clear/	POST	Clear AI chat history

Contributors

GitHub Handle	Role	Primary Areas
Soralith	Developer	Auth, landing, splash animations, settings, account setup, Vercel deploy
Zzeckh	Developer	Dashboard, shop, community, profile, admin panel, developer panel, UI/UX
meowtin-ts	IT Support, Tester, Data Analyst, Technical Writer	Landing page updates, Supabase merge, shop/sidebar updates, payment method UI, regional settings

Tentang meowtin-ts: Berperan lintas fungsi di luar coding inti — sebagai **IT Support** menangani integrasi backend seperti merge Supabase dan konfigurasi regional; sebagai **Tester** melakukan validasi dan penyesuaian pada halaman shop, sidebar, dan alur pembayaran (QRIS/Card) sebelum dirilis; sebagai **Data Analyst** memastikan data produk dan pengaturan regional konsisten setelah migrasi ke Supabase; dan sebagai **Technical Writer** turut merapikan serta memperbarui konten landing page agar informasi produk tersampaikan dengan jelas ke pengguna.

Time	Author	Commit Message
06:53	Soralith	Add splash animation transition from login page to dashboard. — Added animated splash screen transition on login.
06:55	Soralith	Let's not forget again about adding pycache to gitignore. — Added __pycache__ to .gitignore.
06:56	Soralith	Stop tracking DESIGN. — Removed design files from version control.
06:57	Soralith	Stop tracking local database. — Removed SQLite database from tracking.
07:31	Soralith	Let's comment out 'Forgot Password?' first. — Disabled forgot password link temporarily.
09:54	Soralith	Make the sidebar collapsed by default. — Sidebar now starts in collapsed state.
10:02	Soralith	Make the splash animation only appear once for every session. — Splash animation is now session-scoped.
10:07	Soralith	Add transition animation from landing to login. — Smooth transition from landing page to login.
10:14	Soralith	Update role selection UI on login and sign up. — Improved role (Gamer/Developer) selection interface.
13:07	Zzeckh	dashboard update — Dashboard UI/content updates.
13:35	Soralith	Add a 'Finish setting up your account' page after creating a new account. — Added account setup flow (accsetup page).
22:37	Zzeckh	all content update — Bulk content update across dashboard pages.

August 14, 2026

Time	Author	Commit Message
10:33	Soralith	Add a splash animation skip when the user pressed the screen when the animation still running. — Users can tap to skip splash animation.
13:14	Zzeckh	finish the profile pages — Completed profile page implementation.
20:14	Zzeckh	landing page update — Landing page content/design updates.

August 15, 2026

Time	Author	Commit Message
12:00	Zzeckh	profile page + edit profile mode update — Added profile editing functionality.
13:32	Zzeckh	add the settings page — Created the settings page.
13:44	Zzeckh	UI update in settings page — Improved settings page UI.
14:16	Zzeckh	add some component — Added reusable UI components.
14:38	Zzeckh	edit logic of sidebar — Refined sidebar navigation logic.
14:58	Zzeckh	improvement UI in community page — Improved community page UI.
15:06	Zzeckh	Convert wishlist.html to use unified partials — Refactored wishlist to use shared sidebar/topbar partials.
15:14	Zzeckh	refactor(library): use shared sidebar & topbar partials — Refactored library to use shared partials.
15:25	Zzeckh	refactor/dashboard): migrate settings.html to unified partials — Refactored settings to use shared partials.
15:32	Zzeckh	refactor/dashboard): migrate profile.html to unified partials — Refactored profile to use shared partials.
16:01	Zzeckh	add shop page — Created the shop page with product listings.
17:04	Zzeckh	fix bug in shop page — Fixed issues in shop page.
23:21	Soralith	Delete dashboard/__pycache__ directory. — Cleaned up cached Python files.
23:31	Soralith	Untrack __pycache__. — Properly untracked __pycache__ directories.
23:37	meowtin-ts	Update landing page. — Landing page design refresh. <code>b075cde</code>

Time	Author	Commit Message
09:42	Soralith	lobal theme system with localStorage — Built the global theme system with localStorage persistence.
09:49	Soralith	implementing the global theme to dashboard page — Applied global theme to dashboard.
09:57	Soralith	feat(shop): integrate global theme system with 4 theme variants — Applied theme system to shop page (Midnight/Silver/Paper/Obsidian).
10:07	Soralith	feat(community): integrate global theme system with adaptive story rings and posts — Applied theme system to community page.
10:14	Soralith	feat(wishlist): integrate global theme system with adaptive cards and tabs — Applied theme system to wishlist.
10:20	Soralith	feat(library): integrate global theme system with adaptive progress ring and cards — Applied theme system to library.
14:21	Soralith	fix(settings): improve obsidian theme contrast with --on-brand system and accent-card classes — Fixed contrast issues in Obsidian theme.
14:27	Soralith	feat(dashboard): integrate global theme system with adaptive carousel and charts — Theme applied to dashboard carousel and charts.
14:43	Soralith	feat(shop): integrate global theme — Additional shop theme integration.
14:50	Soralith	feat(community): integrate global theme system with adaptive badges and feed filters — Theme applied to community badges and feed.
15:03	Soralith	feat(wishlist & library): integrate global theme system with adaptive badges and play actions for obsidian contrast — Theme contrast fixes for wishlist/library.
19:52	Soralith	Fix bug where changed settings is not saved. — Fixed settings persistence bug.
20:10	Soralith	Remove notifications from settings (Hard to implement for now, especially because of deadline). — Removed notifications settings section.

Time	Author	Commit Message
20:13	Soralith	Gray out timezone section in settings. — Disabled timezone settings section.
20:25	Soralith	Let's change it to favorite games instead, easier to implement. — Replaced complex feature with simpler favorite games toggle.
20:27	Soralith	Remove active sessions in settings. — Removed active sessions section from settings.
21:37	Soralith	feat(dashboard): make wishlist and library pages data-driven via new WishlistItem/LibraryGame models with seeded data management command — Created WishlistItem and LibraryGame models, added seed data management commands.

August 18, 2026

Time	Author	Commit Message
06:50	Soralith	Slight landing page text change. — Minor landing page copy update.
07:09	Soralith	Makes delete my account works. — Implemented account deletion functionality.
07:30	Soralith	Fix bug where uploaded profile picture does not work. — Fixed avatar upload to Supabase Storage.
08:17	meowtin-ts	Landing page update — Landing page design/content refresh. 457e759
10:32	Soralith	feat(profile): link social media edits between profile edit mode and settings Connections, and stop cropping the banner image — Synced social media editing between profile and settings; fixed banner image cropping.
10:37	Soralith	Merge branch 'main' of https://github.com/Soralith/Kaimono — Merge commit.
10:51	Soralith	Make user can't use space on username, and also to have the minimum age of 18. — Added username validation (no spaces) and age minimum (18+).
11:03	Zzeckh	add icon in social media — Added social media icons.
11:08	Soralith	Topbar redesign.. make it simple. — Simplified the topbar design.
11:18	Soralith	Make the logo on the right side of the topbar can also toggle the sidebar expand and collapse. — Topbar logo now toggles sidebar.
11:31	meowtin-ts	payment method update — Updated payment method UI (QRIS/Card). fd52aca
12:50	Zzeckh	Update UI profile page — Profile page UI refresh.
12:50	Zzeckh	Merge branch 'main' of https://github.com/Soralith/Kaimono — Merge commit.
13:44	meowtin-ts	Merge and update — Merge with updates. c052e5d

Time	Author	Commit Message
20:23	Soralith	feat(community): perfect community page with AJAX feeds & channels, functional Games You Follow synced from game detail, and Friends card with online indicators and profile-preview modal — Major community page overhaul: AJAX feed loading, channel filtering, game following from detail page, friends with online status.
20:32	Soralith	feat(community): restyle the Friends card with story-style circular avatars and online/offline rings — Friends card redesigned with circular avatars and online indicators.
20:40	Soralith	feat(profile): remove the Privacy, Appearance, Connections, and Notifications tabs and panels from edit mode — Simplified profile edit mode.
21:06	Soralith	feat(dashboard): drive carousel, discount, and game-of-the-day cards from the shared products.js catalog so they link to working game_detail pages — Dashboard cards now pull from database and link to game detail.
21:17	Soralith	feat(community): remove the Friends and Games You Follow cards and their related JS/CSS — Removed Friends/Games You Follow cards from community.
21:47	Soralith	feat(settings): make regional preferences and display options functional globally and redesign the Connections UI with brand logos — Made regional settings functional; added brand logos to Connections.
23:20	Zzeckh	Admin panel, dev panel, static, no routes. — Created admin and developer panel pages (static, not yet routed).

August 19, 2026

Time	Author	Commit Message
00:00	Zzeckh	fix some bugs — Bug fixes across the platform.
00:14	Soralith	feat(community): remove the like feature entirely and fix edit-post so poll questions update correctly — Removed like feature; fixed poll question editing.
00:42	Soralith	feat(game_detail): apply the global theme (bg-card/surface, themed text, brand remap with obsidian on-brand cascade) to the game detail page — Applied global theme system to game detail page.
01:05	Soralith	feat(shop,library): drive shop and game_detail from a new dashboard_shop table with admin CRUD, and make the library per-user with game purchases auto-triggered by checkout — Created ShopProduct model, admin CRUD for products, per-user library, auto-purchase on checkout.
01:07	Soralith	feat(dashboard): redesign Explore Collection as a circular-icon-chip pill button with a rotating arrow on hover — Redesigned Explore Collection button.

Time	Author	Commit Message
02:58	Zzeckh	ADMIN PANELLLLLLLLLLLLLLLLLLL . — Completed admin panel implementation with full CRUD.
02:59	Zzeckh	Fix the game trailer video position placement . — Fixed video trailer positioning on game detail.
03:03	Zzeckh	Backup, backup . — Backup commit.
03:21	Zzeckh	Make wishlist works . — Made wishlist functionality fully operational.
03:22	Zzeckh	Man, okay, let's just remove those annoying 12 text . — Removed unwanted text elements.
03:34	Zzeckh	Tell me where this ahh blur effect come from . — Investigated/fixed unexpected blur effect.
03:36	Zzeckh	Yeah, soon, I am done with this thing. I need sleep. Like, right now. Sleep. But Deadline? — Late-night commit, nearing completion.
03:38	Zzeckh	Don't add more work now . — Stabilization commit.
04:04	Zzeckh	Developer panel . — Created developer panel for game submissions.
04:12	Zzeckh	Developer pannel as game commision . — Implemented game commission/submission workflow.
04:16	Zzeckh	Fix where video trailer does not appear if it was uploaded as a developer game . — Fixed YouTube trailer rendering for developer-submitted games.
04:35	Zzeckh	VERCELLLLLLLLLLL . — Initial Vercel deployment.
07:09	Soralith	Change game title in landing page . — Updated game titles on landing page.
07:19	Soralith	Image change in landing page . — Updated landing page images.
08:05	meowtin-ts	regional — Regional settings updates. 664d670
08:06	Zzeckh	Reedit landing page . — Landing page redesign.
08:10	Zzeckh	Remove 'admin-locked' text . — Removed admin-locked UI text.
08:13	Zzeckh	Remove connection settings . — Removed connection settings section.
08:18	Zzeckh	Make search bar in settings work . — Implemented functional search in settings.
08:22	Zzeckh	Make the search more dynamic . — Enhanced search to be more dynamic/responsive.
08:25	Zzeckh	update UI in game_detail.html — Game detail page UI improvements.
09:05	Zzeckh	add reviews feature in game_detail.html — Added user reviews to game detail page.
09:31	Zzeckh	fix some bugs, yatttaaaa — Bug fixes (celebratory commit).
09:42	Zzeckh	add payments in game_detail and make it function to library — Implemented payment checkout on game detail, auto-adds to library.

Time	Author	Commit Message
09:54	Zzeckh	linked data in library + whislist to profile page — Library and wishlist data now displayed on profile page.
09:56	Soralith	Landing page update. — Landing page final update.
09:56	Zzeckh	WAITTTTTTT — Quick fix/adjustment commit.
10:03	Soralith	Connect landing page to database. — Landing page now pulls featured/new release data from database.
10:17	Zzeckh	dahsboard change, linked to database — Dashboard fully connected to database for products/stats.
10:33	Soralith	AI, AI is AI. — Integrated Google Gemini AI companion feature.
